

RIGHT WAY

- 1 Discard any loose soil which has been dislodged.
- 2 Insert repair tool just outside the back of the ball mark. Pull the head of the repair tool forward and thereby stretch the compressed turf over the centre of the hole.
- 3 Repeat this motion on all side of the hole. This action stretches undamaged turf over the ball mark, providing instant recovery.
- 4 Gently tap the repaired area with your putter.

WRONG WAY

- 1 **DO NOT** replace dislodged soil in the pitch mark.
 - 2 **DO NOT** pry up the centre of the depression with the repair tool as it exposes the soil and will delay the healing process.
 - 3 **DO NOT** insert repair tool and twist it. This only breaks more turf loose.
- REMEMBER:** A ball mark takes only 15-20 seconds to fix correctly but over 3 weeks to heal if wrongly fixed. Please do it the right way.

PLEASE HELP US LOOK AFTER THE COURSE

- REPAIR YOUR PITCH MARKS ON THE GREEN
- REPLACE DIVOTS
- RAKE BUNKERS
- PLEASE PUT RUBBISH AND BROKEN TEES INTO WASTE BINS ON THE TEE BOXES

\$262 MILLION

For more than a century, Oregon State has been developing dryland wheat varieties that help Eastern Oregon growers increase yields and generate more revenue. It's part of \$262 million in Oregon State research — more than all other public universities in the state combined — that delivers real-world solutions.
